OVERVIEW

Every drilling parameter, one screen.

The instrument is used for the acquisition, display, analysis and storage of drilling data at the drilling site. A new type of touchscreen centrally displays all parameters, so the driller can operate conveniently through the touchscreen.

PERFORMANCE FEATURES

- 01 User-friendly HMI**
Human-machine display interface built for the driller.
- 02 Flexible display**
Numerical, graphical and instrument displays to customer requirements.
- 03 Database storage**
Complete data retention.
- 04 LAN connection**
Data shared between remote terminals at the well site and the drilling console.
